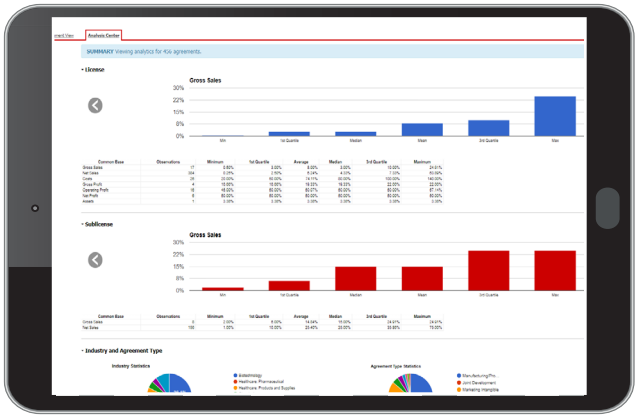
Royalty Rates App

Search. Identify. Document. Evaluate.



The Royalty Rates App brings ultimate insight and control to your comparables research. Access to full-text and summary agreements along with thousands of disclosed royalty and market rates significantly reduces research time while revealing industry transaction activities.

ktMINE's technology goes beyond the basics found in other providers to deliver diverse payment data, international public filings, and dozens of transaction types for confident, defensible analyses.

Search

Leverage powerful filters to uncover comparables by searching via keyword, industry, territory, and beyond.

Identify

Quickly scan results by reviewing summary information or dig deeper with full-text documents.

Document

Share insights and research progress by exporting digestible agreement summaries.

Evaluate

Confidently review transactions, determine rates, and structure terms with fact-based analyses back by global IP data.
