

Identify. Review. Evaluate.

Gain transparency to accelerate your commercialization efforts with ktMINE's global intellectual property (IP) data. The Commercialization App arms technology transfer professionals with royalty rates, licensing, and agreement data to confidently negotiate strategic agreements that drive monetization.

Technology transfer professionals rely on ktMINE's Commercialization App to uncover potential partners, determine the value of technologies, and confidently construct and negotiate licensing terms. Evaluate inventions while strengthening commercialization efforts with ktMINE.

Identify

Pin-pointing the organizations entering and exiting technology space is difficult. The Commercialization App takes these complexities out of your research process. Access to Our global transaction data allows you to quickly and accurately identify the market participants actively making deals within your space.

Review

Make informed decisions by leveraging the Commercialization App's market-based evidence. With a simple search of a patent classification or keyword, uncover royalty rate benchmarks and trends.

Evaluate

Access to full-text license and collaboration agreements, powers your organization to enter into negotiations with the support needed to justify your payment and contractual terms.

Key Benefits

Identify potential market partners

Access ktMINE's eight datasets to instantly review and monitor top inbound and outbound market activities

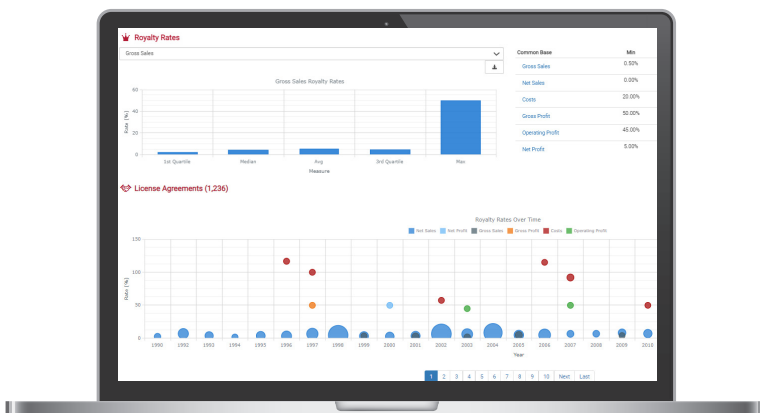

Value innovations with market-based evidence

Uncover comparable transactions to determine royalty rates as well as upfront and milestone payments

Analyze trends to determine invention viability

Track new technology developments both in direct or adjacent markets with advanced analytics and visualizations

Features

- ▶ Full licensing and collaboration agreement summaries and filing documentation
- ▶ Global coverage with over 250 unique territories
- ▶ Patent keyword searching capabilities
