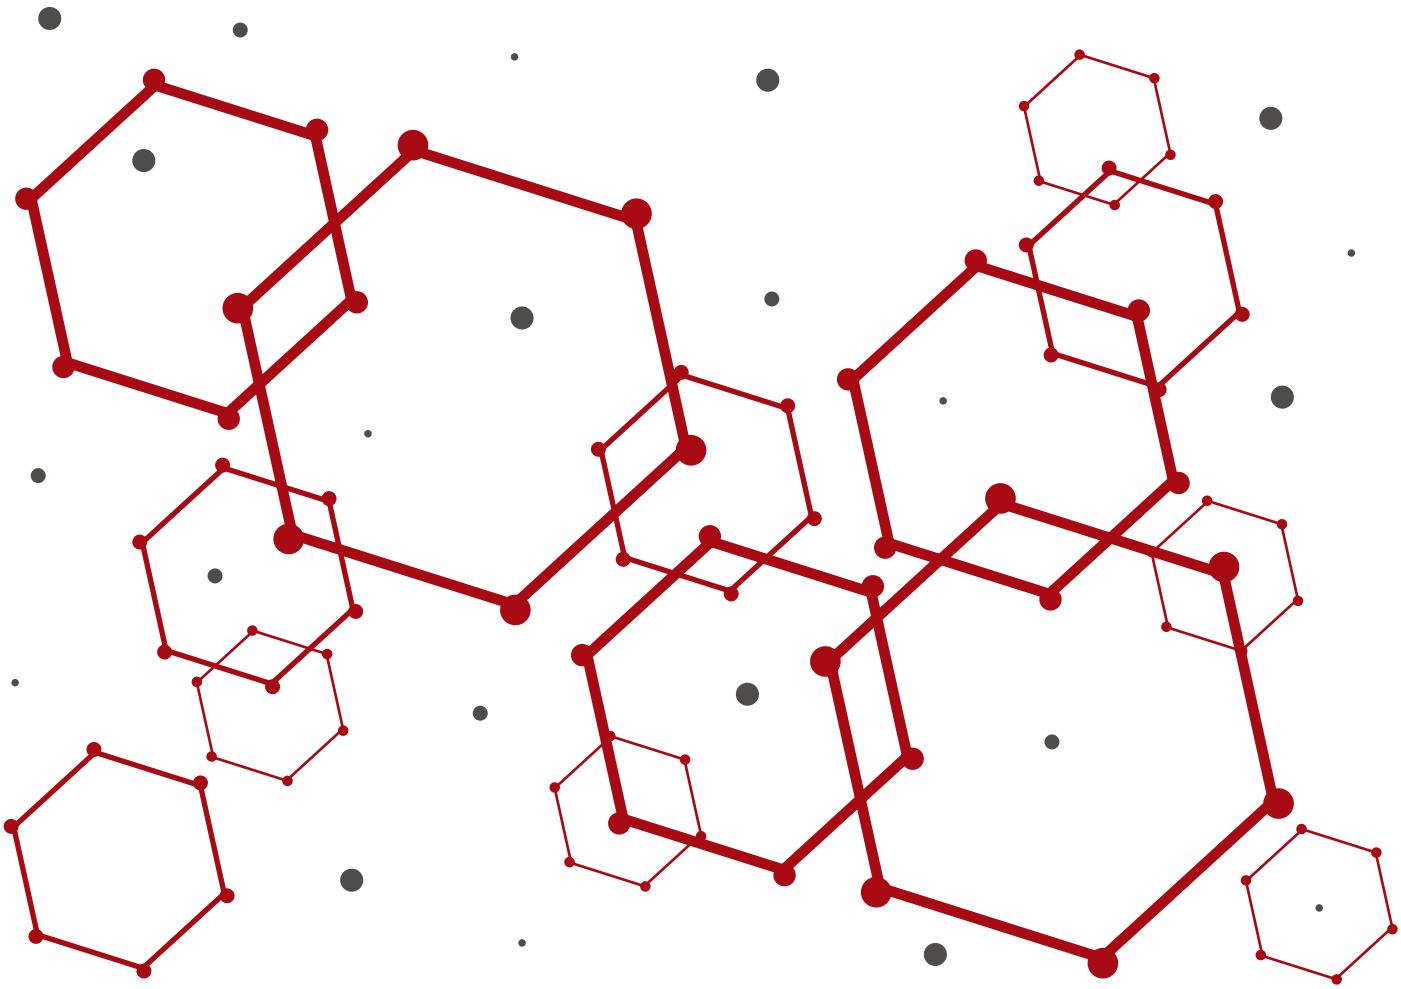
DATA AND APPLICATIONS



ktMINE

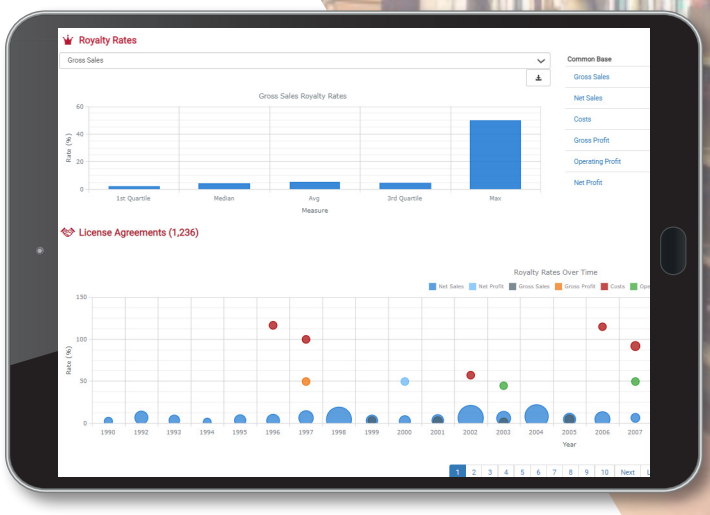
for Universities

Accelerating the commercialization of inventions and academic research

Actionable insights

Successfully research and commercialize inventions with ktMINE. Universities trust our IP data for a complete view of the patent and licensing activities happening in the market. Streamline the commercialization process with ktMINE and deliver added value to your university.

Our clean, reliable data empowers researchers and Technology Transfer professionals to identify those interested in specific technologies in seconds. Equipped with these insights, Technology Transfer offices make deals faster, easier, and based on real-world evidence.



ktMINE enables universities to strengthen business intelligence research by providing IP data and insights into companies, technologies, and industries.

Our applications and data services support:

- Technology Transfer Professionals
- Research Librarians
- Professors and Students

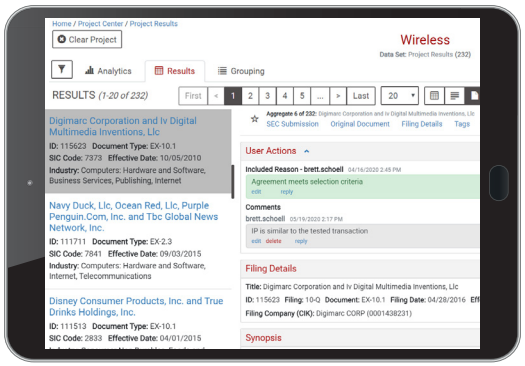
Benchmark App

Navigate. Analyze. Manage. Document.



The ktMINE Benchmark App is the one-stop solution designed to simplify your transactions research. Empowered by a refined research experience, Technology Transfer professionals solve common workflow challenges with the use of robust global data, advanced filters, and enhanced project management to value and benchmark their IP.

With an emphasis on workflows, functionality, and collaboration - quickly navigate through the noise to identify critical data that includes licensing information to confidently find partners, value IP, and structure profitable deal terms. Search and analyze agreements by industry, payment type, geography, IP type, entity type and more for an assured commercialization strategy.

Navigate

Search with powerful filters to easily navigate detailed contracts and extract relevant information.

Analyze

Utilize enhanced views and workflow abilities to efficiently analyze data.

Manage

Leverage the ability to document and track work within the product to experience a better, more streamlined, and collaborative project management process.

Document

Extract the information necessary to support your research.

Key Benefits

Enhanced Searching

Save research time with improved search filter logic coupled with enhanced data, such as entity information, payments, and transaction type, including deal structures. Eliminate clutter by specifying the exact transaction type you're most interested in viewing

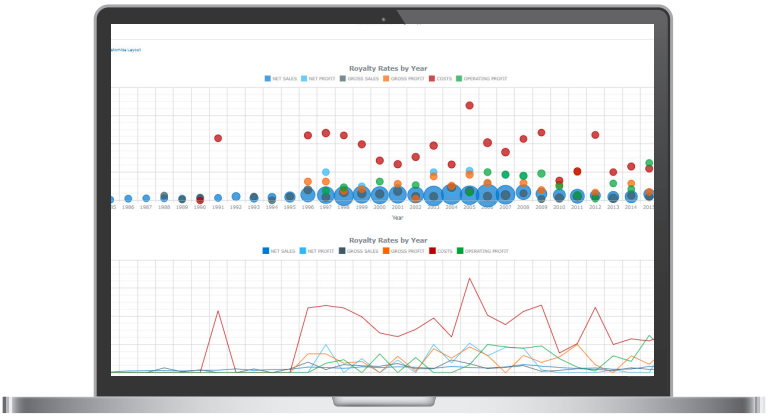
Project Center

Drive collaboration with Project Center and eliminate knowledge gaps by saving and sharing annotations for team review whenever you need

Paragraph View

Dissect agreements in our Paragraph View tool allowing segmentation based on contractual language, providing real-world examples of previously agreed-upon contracts

Features



- Full-text agreements
- Licensed patents
- Licensed trademarks
- Franchise, tangible, services, R&D, intangible & more

Commercialization App

Identify. Review. Evaluate.

Gain transparency to accelerate your commercialization efforts with ktMINE's global intellectual property data. The Commercialization App arms Technology Transfer professionals with royalty rates, licensing, and agreement data to confidently negotiate strategic agreements that drive monetization.

Technology Transfer professionals rely on ktMINE's Commercialization App to uncover potential partners, determine the value of technologies, and confidently construct and negotiate licensing terms. Evaluate inventions while strengthening commercialization efforts with ktMINE.

Identify

Pin-pointing the organizations entering and exiting a technology space is difficult. The Commercialization App takes these complexities out of your research process. Access to our global transaction data allows you to quickly and accurately identify the market participants actively making deals within your space.

Review

Make informed decisions by leveraging the Commercialization App's market-based evidence. With a simple search of a patent classification or keyword, uncover royalty rate benchmarks and trends.

Evaluate

Access to full-text license and collaboration agreements, powers your organization to enter into negotiations with the support needed to justify your payment and contractual terms.

Key Benefits

Identify potential market partners

Access ktMINE datasets to instantly review and monitor top inbound and outbound market activities

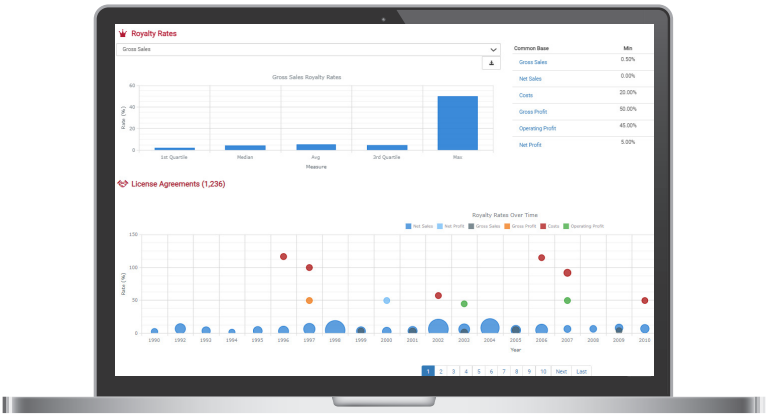
Value innovations with market-based evidence

Uncover comparable transactions to determine royalty rates as well as upfront and milestone payments

Analyze trends to determine invention viability

Track new technology developments both in direct or adjacent markets with advanced analytics and visualizations

Features



- Full licensing and collaboration agreement summaries and filing documentation
- Global coverage with over 250 unique territories
- Patent keyword searching capabilities

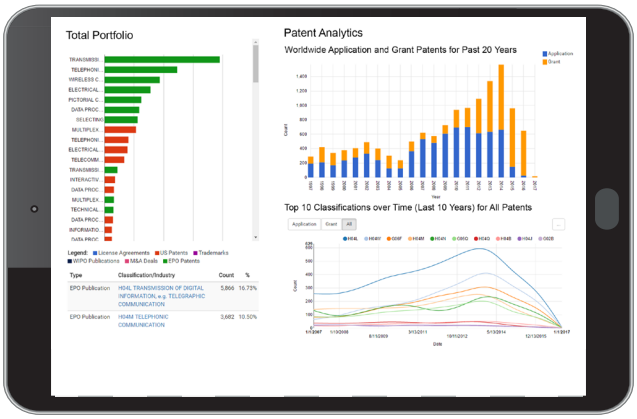
Profiles App

Search. Build. Analyze.



Strengthen IP intelligence with access to global insights for any company's IP portfolio. ktMINE Profiles App significantly reduces research time, maximizes analysis power, and strengthens business decisions. When IP questions arise around a competitor's, client's, or partner's activities, the ktMINE Profiles App is the ultimate resource.

The Profiles App's innovative searching capabilities allow users to refine searches by industry, patent, classification, or any other aspect of IP. In three clicks or less, build a profile for a full corporate tree including subsidiaries, holding companies, and company name variations.

Search

Advance company research with clean, reliable insights into agreements, patents, patent assignments, trademarks, trademark assignments, and M&A deals.

Build

View complete IP profiles through millions of connected corporate trees with the ability to combine company profiles for a more holistic view.

Analyze

Closely monitor your competitor's, client's, and partner's IP activities to remain ahead.

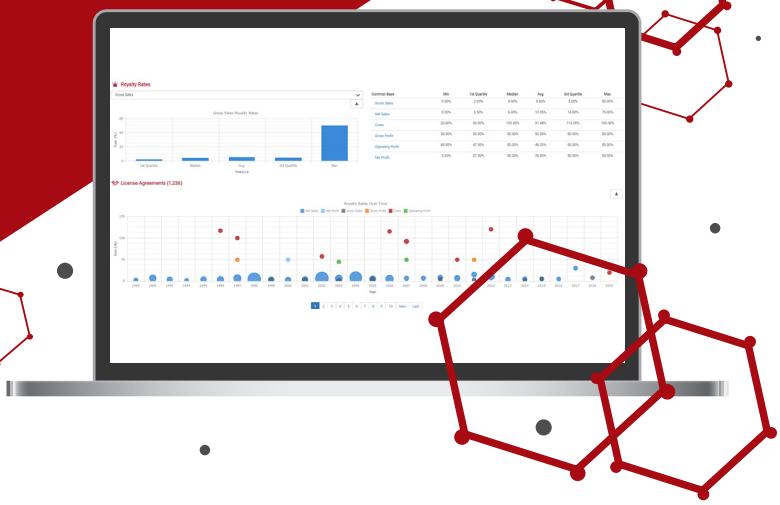
ktMINE Data Delivery

Discover ktMINE's applications and data services

Access data in a way that meets your organization's needs



From Bulk Data, API, SaaS Applications, Widgets, and Custom Data Services, ktMINE provides options that successfully address your unique data needs while reinforcing your company's strategy.

API

Experience the benefits of ktMINE's API with custom access to global IP data for your research and systems without managing the on-premise requirements.

Custom Data Services

Beneficial for organizations that require greater customization outside of an API.

Widget

Leverage global IP data and visualizations integrated directly into existing systems with ktMINE.

Bulk Data

Receive and process bulk data within a preferred system.

SaaS App

Access six market-leading applications designed for streamlined analysis of global IP data.
