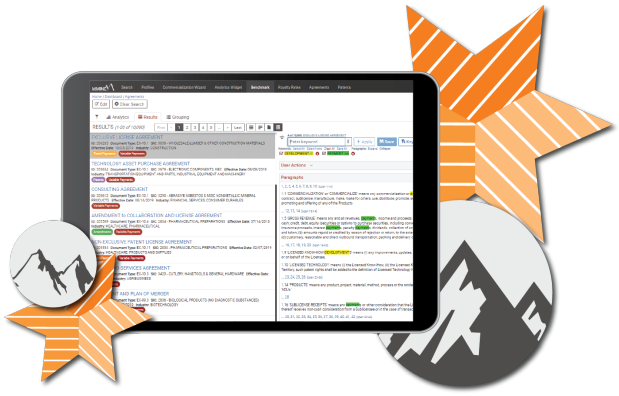
Benchmark App

Navigate. Analyze. Manage. Document.



Law librarians are a vital part of a firm's transactions research - navigating data sources to identify the transactions that have occurred. Without the entire picture, this can be impossible to accomplish. Providing access to all transactions data including licensing, services, research and development, manufacturing, distribution, and more, the ktMINE Benchmark App ensures your strategies are strong and your research complete.

The ktMINE Benchmark App equips you with a sophisticated research experience. With an emphasis on workflows, functionality, and collaboration - quickly navigate through the noise, and identify critical data for more accurate analyses.

Navigate

Search with powerful filters to easily navigate detailed contracts and extract relevant information.

Analyze

Use enhanced views and workflow abilities to analyze data more efficiently than ever before.

Manage

Leverage the ability to document and track your work within the product to offer a better and more streamlined project management process.

Document

Extract the information necessary to support your research.

Key Benefits

Enhanced Searching

Save research time with improved search filter logic coupled with enhanced data, such as entity information, payments, and transaction type, including settlement structures. Eliminate clutter by specifying the exact IP type you're most interested in viewing.

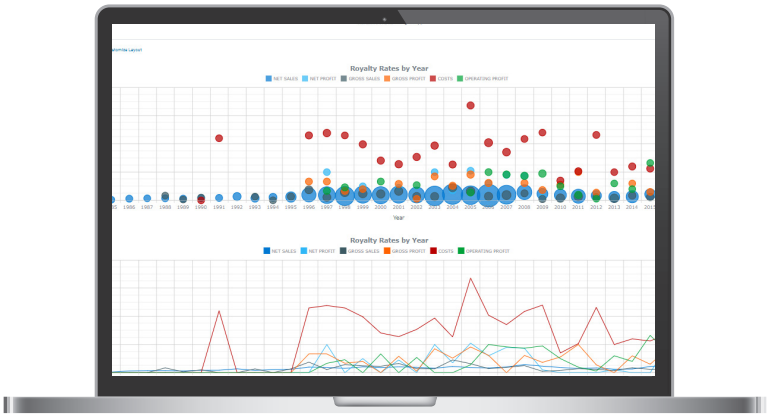
Project Center

Drive collaboration within the app and eliminate turnover issues by saving and sharing annotations for team review whenever you need.

Paragraph View

Dissect agreements in our Paragraph View tool allowing segmentation based on contractual language, providing real-world examples of previously agreed upon contracts.

Features



- Global Coverage
- Full-Text Agreements
- Licensed Patents
- Licensed Trademarks
- Franchise, Tangible, Services, R&D, Intangible & More

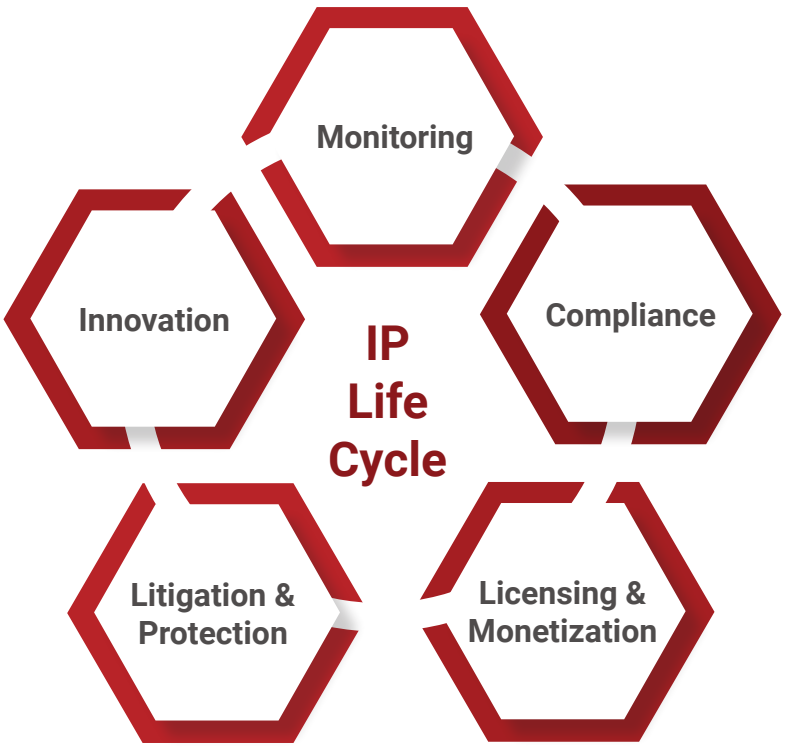
Search App

Search. Analyze. Engage.



Understanding IP trends solves business challenges and enables growth for organizations. A complete view of the IP landscape is paramount to executing business strategies. Drive IP engagements and accelerate IP strategies with ktMINE's Search App. By leveraging data covering the full IP lifecycle, the Search App enables you to execute IP strategies and efficiently respond to market shifts. **Discover transactional insights not available in other products - giving you a competitive advantage.**

Confidently perform analysis across all stages of the IP lifecycle.

Search
Research global IP data with analytics to identify trends, understand transactions, and develop your IP engagement strategy.

Analyze
View analytics with the support of access to the source information to make confident and strategic decisions without working out of a black box system.

Engage
Develop and support your IP engagements by extracting the information that supports your decisions from spreadsheets to pdfs.

Navigate the IP landscape in its entirety.

The Search App covers the entire IP landscape from innovation and monitoring to licensing & monetization, litigation & protection, compliance, and prosecution. Seamlessly connect any saved searches to the ktMINE Analytics Widget App for an up-to-date, shareable snapshot of live IP analytics across internal teams in a preferred operating system.

- Research and identify companies innovating in a particular industry.
- Discover commercially valuable technologies.
- Protect your position by reviewing relevant industry transactions.
- Value IP assets to support your transaction strategy by accessing transactions that include royalty rates, fixed payments, and other payments.
- Identify key patent terms and trends with Patent Full-Text View.
- Access and share current IP transactions with cross-functional teams from a local computer, shared drive, intranet, or CRM with the Analytics Widget App.

Key Benefits & Features

- Full-text agreements and patents
- Custom reports
- 100+ graphic visualizations
- HTML, PNG, JPG, and PDF output
- Unstructured IP data
- A customer support team
- Access to all past exports
- Custom alerts
- Saved searches, sets, and recent searches
